

LCA0009 - Loadcell amplifier with two set points

A range of Process Weighing Equipment designed specifically for use on Mortar, Readymixed Concrete and Precast Concrete Plants.

The **LCA-0009** is an extremely versatile loadcell amplifier with a wide range of options to suit most types of weighing applications.

0 -10 Volt scaled output is standard on all versions with an optional 4 - 20mA output available.

Standard features

- High intensity 5 digit LED display
- Push button tare
- Two preset set points
- Excitation for up to Six loadcells
- Fully scalable from -3 to + 30mV
- Up to 29999 counts
- Adjustable resolution / decimal place
- Error / Status message display
- 0-10 Volt output

Software Options

- Over 20 options available including the following:
- Two user adjustable setpoints
- Automatic in-flight compensation
- Automatic tare
- 4 - 20 mA output
- Backweighing version
- Zero output with tolerance bands
- Course and fine feed options

From experience Norstrom know that no two applications for our products are the same. Norstrom are therefore happy to add special functions or tailor our products and systems to meet customers individual needs.
