

## Product Data Sheet

### Pumpmaster - 2 MK2 / Blockmaster - 2 MK2

**A twin sightglass volumetric admixture system for use on manual or automatic plants**

#### Pumpmaster-2 System

Designed for use on manual Readymix or Mortar plants.

- A single sightglass system designed to be used with one admixture.
- Sightglass capacities available: 1.5ltr, 2ltr, 3ltr, 4ltr, 6ltr, 9ltr and 12ltr.
- Scale graduations: 1.5ltr and 2ltr have 25ml increments 3ltr and above have 50ml increments
- Comes complete with one fill pump and one discharge pump mounted on a mild steel skid.
- Pumps can be supplied in a floor mounted or wall mounted weather proof enclosure.
- Supplied with manual start button or remote start switch.

#### Blockmaster-2 System

Designed specifically for use on Precast and Block plants where automatic systems are essential.

- Supplied either manually operated by a push button or with a remote start unit to enable the system to be started by a pulse signal.
- Can be modified to fill and then hold until the start button is pressed or a remote signal is received.
- An audible and visual strobe alarm can be fitted to the control panel to alarm if the admixture has not been dosed.

#### Admixture Pump Cabinet

- Pumpmaster products only use MONO MS, MM or ML range PD pumps .
- MONO pumps are extremely hard wearing and reliable .
- Flow rates vary from the MS pump at 13ltr per min to the MM pump at 26ltr per min.
- Supply voltages available 110v, 240v or 415v.
- At extra cost a weather proof pump cabinet can be supplied. This protects the admixture pumps from the atmosphere and is available either as a wall mounted cabinet or a floor standing cabinet as illustrated.
